**GUTMANN** Door Thresholds | Sash Cover Profiles

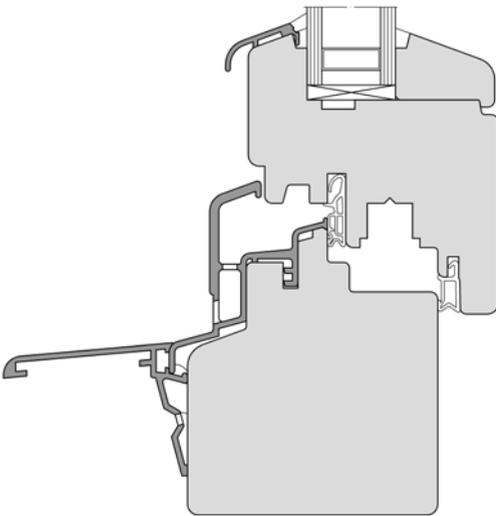

## GUTMANN SIEG 22/21 Threshold with DL 50 Core Covering

### The ideal connection to the floor covering

Elegantly and cleanly, the cover runs across the entire element width to the outer frame.

#### ▶ Product Details

- GUTMANN COMPOSITE THRESHOLD with positioning bar (screw fastening)
- Proper connection across the entire element width with continuous stick coverage
- Rational application of sealing membranes
- Subsequent installation of the frame cover is possible (rational storage, no transport damage)

## GUTMANN Sash Cover Profiles

### Refuge for stressed wood

The sash and frame of a window have considerable exposure to snow, ice, hail, rain and UV radiation. The sash cover profiles developed by GUTMANN effectively and durably protect the heavily stressed wood at the bottom of the sash. They can be installed as readily on new windows as during renovation of existing windows.

In addition to the standard white, brown and silver colors, the sash cover profiles are available in every RAL color.

#### ▶ Product Details

- Maximum protection from precipitation and steadily increasing UV radiation
- Optimal protection of the heavily-stressed bottom sash member in new and already installed windows
- Easy installation with clip holders and additional accessories
